

ROCKS

Across

3. Transportation
4. Metamorphism process by which rocks are transformed by pressure and heat deep within Earth
6. Volcanic
8. The process of becoming solid
10. Metamorphism process by which rocks are transformed at or near Earth's surfaces with magma or lava
13. The breaking up of rocks
15. No layers
16. Fragmental
17. The way light reflects on the mineral
18. Resistance to physical change due to atomic arrangement
20. A type of rock that is form when any rock is changed by heat and/or pressure
21. The color of the powder form of the mineral
22. Plutonic

Down

1. The substances of which rocks are made of
2. Pieces of rocks
5. A test that is not reliable due to impurity
7. A type of rock that is usually form by the compression and cementing of sediments
9. Layers
11. An uneven breakage of mineral
12. A type of rock that forms from the solidification of molten rocks
14. An even breakage of mineral
19. Dropping of sediments
